

# Just stick it on. Protect from viruses!

Inactivates 99.98% of viruses and bacteria after only a few minutes\*.

**Effectiveness confirmed**  
in 3 independent  
Laboratory tests\*

**Rapidly effective**

**Antiviral & Antibacterial**

**Self-disinfecting**

**Employee protection**

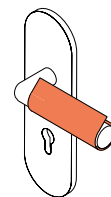

The ion release of copper significantly shortens the survival time of viruses, bacteria and fungi. Due to its positive properties, hospitals, for example, also use solid copper door handles. Our three-dimensionally copper-plated textile has a 7-fold higher ion release compared to solid copper. After only a few minutes, this enables a demonstrable inactivation of 99.98% of corona viruses, among others\*.
